# Nursing care

**If you have a disability or illness, are you considering how best to receive additional nursing care?**

In our nursing homes, a qualified nurse is on duty 24 hours a day, every day. They offer you the best level of medical care available outside of a hospital.

In each Balhousie Care nursing home our skilled nurses work in partnership with other medical professionals, such as occupational or physical therapists, to deliver the full range of medical procedures and therapies needed on site; meaning you can relax and enjoy the calm surroundings and companionship of a residential home.

We believe your care and support should be individual to you. Our management and care teams develop a personalised support plan with you, and will ensure your health and well-being, including your medication, is always looked after sensitively and diligently.

In today's world when families often live farther apart, our residential nursing homes offer you and your loved ones peace of mind that your needs are always being attended to, in the way that is right for you. Our carers provide both physical and personal support and attend to all your care needs.

The care we provide will also complement and work in tandem with the care provided by your own Doctor and other community health professionals.

**We invite you to visit any of our 23 Care Homes, meet the team, see the accommodation and consider which feels most like home to you.**

**For more information, call us on 01738 254254.**
